Firms Say Action Is Reply to Union Walkout Today

WASHINGTON (AP) — The nation's railroads said today they will put into effect Friday work rules that are the center of a five-year controversy. This is expected to trigger a nationwide rail strike.

The announcement by J. E. Wolfe, chairman of the National Railway Labor Conference, said the action was in response to a strike begun early today by four operating unions against the Illinois Central Railroad. His statement said:

night against the Illinois Central and its customers, is typical of the unions' continued irresponsibility in the featherbedding dispute. As neither the public nor as affirmed by the U.S. Supreme Court, at 12:01 a.m. Friday, April 10."

times have meant the difference between injury and possible death to many a person walking along the highways. They survived a near-brush with death.

John Waskivich, Jr., and William Moler, two West Branch High School students, were not as fortunate. They were killed, young Waskivich Monday evening while on his way from a scholastic track meet and young Moler while walking home from a school dance several weeks ago. The Smith Township district also is charged with two other pedestrian deaths earlier in this year.

The lesson is tragically obvious. Any person, young or old, who walks along today's busily-traveled roads is a potential traffic victim. There are recorded cases of driver negligence but too often pedes-

Seconds and fractions of inches some- trian deaths are attributable only to the individual's own carelessness or failure to recognize the risks involved as cars and trucks whiz by in two directions. And, at night, most motorists will agree that it's hard to distinguish anyone alongside a highway after dusk unless car lights happen to shine directly on the person or groups on foot. Dark clothing also makes a dangerous camouflage.

There are apt to be more pedestrian deaths along our district highways unless parents and school officials make a concerted effort to warn young people of the hazards. And, until Daylight Savings Time goes into effect at the end of this month, warmer weather is apt to bring more children onto streets and highways. Vigilant motorists will be thankful, not re-

#### Old Water Report Recalled

At least the City of Salem now knows where its water went. It never had it-205 million gallons, that is.

Utilities Superintendent William Thompson revealed Monday that a survey by a professional engineering firm from Columbus had disclosed that the East Cold Run Reservoir, built in 1952, holds 475 million gallons of water—a sizeable lake at that but not the 680 millions originally reported by the Chester Engineers of Pittsburgh, which completed the reservoir.

The latest information brings to mind a report submitted by then City Solicitor Jay Hunston and then City Engineer F. S.

In this respect, NATO is like the U.S. foreign aid program. If it were as ineffectual as its critics claim it is, why would the Soviet Union want to get rid of it?

Barckhoff, Sr., when the project was about two-thirds completed that the engineers' estimates of 680 million gallons could hardly be correct because of an island hump in the middle of the lake. The Utilities Commission at that time disagreed, along with other findings in a 7-page report drafted at the suggestion of former mayor Harry Vincent.

Of paramount importance, though, is the fact that the city of Salem is fortunate to have a good supply of surface water, ample to meet existing and future domestic and industrial needs.

Like critics of the United Nations who In the same line of reasoning, if the Soviet Union were as bubbling over with good will toward Europe as it claims to be, why would it want to get rid of and might be useful again.

The miracle of postwar Europe cannot be credited to NATO alone, but it would have been impossible without NATO. On its 15th anniversary, with perhaps only five more years to live, NATO continues to be more impressive to the Soviet Union than to some of the nations it protected against the possibility of a massive Russian invasion until the United States could nuclear bombs. That's all it was designed

Now that he has gone from us with all the honors a grateful country could bestow, I finally feel that I know why it took me so long to comprehend his position in the Korean War.

He came from an era and an environment in which things were positive or negative, no doubts left hanging. Wars were won or lost. Virtue and evil were clearly defined. The world was black or white, never gray.

His life carried him into a new era and another environment.

He said, himself, that he abhorred war because it no longer settled anything; that it ruined both sides. Yet, his nature made him seek definitive conclusions on the battlefield.

HE COULD NOT understand a war in which political considerations took precedence over strategy and tactics. It went against his grain.

But it did not go against his judgmentand this was what made him hard to understand. He was aware of the world as it is, but his feelings came from a world that had ceased to be. He yearned for definitive conclusions in a world that no longer made definitive conclusions possible.

## Violence In'63 Rail Dispute

By VICTOR RIESEL

One of the "sleeper" stories creeping up on the headlines is a full report of the violence which hit the Florida East Coast Railway

rassed, labor troubled, behind-schedule Merritt Island 'moonport" and secret "Titan III" missile site alongside the Cape Kennedy space base.

This violence ended on the night of March 12, when the FBI staked out 18 special agents and a relay of five unmarked radio cars in and around the bushes at an Indian River County, Fla., railroad trestle.

That night the government agents watched three men wire 50 pounds of dynamite sticks to the bridge tracks spanning a 30-foot canal.

I was in the county at that time and can vouch for he meticulous care taken by the G-men. They cut the dynamite loose before it could explode under an oncoming southbound freight train. In the following hours they arrested three strikers and charged them with violating the federal train-wrecking statute.

Then on March 25 they picked up John Katsikos, recording secretary of Local 555 of the Brotherhood of Railroad Car Men in Miami. These men are innocent until proven guilty and there is no evidence of links with their unions, which have been on strike for more than 14 months.

A FEW HOURS after the first arrests, I drove to Jacksonville to pick up a full report on the terror hurled at the railroad, its employes and its property. I've spent weeks checking it out. It contains 243 acts of violence, vandalism and brutal assaults. I analyse them here in the fervent hope that so much revulsion will be stirred against such acts that they never again will be used by anyone regardless of the issues.

Since Jan. 23, 1963, sabotage and dynamite have derailed 177 railroad cars and 22 locomotives.

Wires were strung across the tracks at a height level with a man's neck. Thus, if he were riding in an improvised open vehicle which preceded some decapitated.

Rifle fire blasted picture windows of homes of some nonstriking employes. Men were beaten.

On March 7, when some employes were repairing damaged cables at Fort Pierce, a man in a car drove at them at high speed many times-and applied the brakes only at the last moment and last few inches before

ROCKS AND GUNFIRE hit the cabs of fast locomotives. Signal systems were sabotaged, thus endangering the non-striking train crews. "Molotov cocktails" (gasoline containers which explode) were hurled at railroad property.

Paint bombs made of light

bulbs were threwn at the homes of company executives is New Smyrna Beach. Smear bombs were created by whiskey bottles filled with red paint. Some police who attempted

to keep order were attacked. One patrolman was stopped by road block on July 19. He was pulled from his car and beaten. His auto was found wrapped around a pole. Another officer received anonymous phone calls threatening his life because he had been trying to prevent violence.

There have been explosions, burning of property, fire on bridges, slashing of cable and air hose, steel rods placed in rail joints, roofing nails thrown on roads approaching the railroad offices along the line; a chain strung across the tracks, entrances blocked until sheriff's men arrived and dynamite hidden in boiler tubes so it would explode when hit by heat.

THERE IS NO DOUBT that leaders of the national striking unions and the heads of the five on-train brotherhoods, which have respe lines, are alarmed by the local

Recently I talked with Charles Luna, president of the Brotherhood of Railroad Trainmen. He was aghast at what he heard and on March 24 wrote me the

"Bombing and violence have this country. . . we are strong-

ly opposed to any such measures, and. . . any member of this organization found guilty of such practices will be expelled. . . .

Then, referring to the men charged with planting the dynamite, Luna added:

"These men will, of course, have legal defense, inasmuch as the presumption of innocence is a vital part of American law and tradition. This is not to say that their defense will be borne by the brotherhood. But they are certainly entitled to a defense and to the security of trial by jury in American courts.

"As you know, two of the men charged with the dynamiting are members of the Brotherhood of Railroad Trainmen. and they will be subject to the same interpretation of our law as anyone else, that is, should they be found guilty of violation of the law and a breach of their duty to the Brotherhood, they will be expelled. But first they are entitled to a fre and fair trial."

will find themselves in court. The FBI is continuing an intense investigation, for it is not satisfied that it has found all who should be apprehended.

But the number of suspects is not all important. What matters is that violence helps no cause and civilized progress is no place in labor disputes in retarded. Jungle tactics must be smashed once and for all time.

## Slow Terror

By LEON DENNEN According to Allen Dulles, the none-Communist nations have no policy to meet the challenge of Red subversion in the unde-

veloped countries. This is a disturbing admission by the former chief of the Central Intelligence Agency. Communism has been a daily threat to western society for close to 50 years. Yet it is tragically true, as Dulles asserted in a recent speech that the Free World, the CIA included, has found no effective antidote to Red terrorism and subver-

LATIN AMERICA is the latest case in point. President Johnson, in his effort to chart a new course for the Western Hemisphere, is trying to revitalize the Alliance for Progress. Yet the alliance, it is clear, will remain a dead letter as long as Latin America is in the grip of Fidel Castro's terror.

Specialist on communism, in fact, have noted the emergence of a new and subtler Red strategy in most countries below the Rio Grande since Castro's recent visit to Russia.

Premier Khrushchev seems to have shelved, for the present at least, Castro's plan to subvert established govern-ments and promote Red regimes patterned on Cuba's dictatorship. Instead of frontal attacks, Moscow's new policy concentrates on limited acts of terrorism designed to keep Latin America in a permanent state of political and economic chaos.

This is especially evident in Brazil, Chile, Colombia, Panama and Venezuela.

According to reports at the United Nations, Fidel Castro, since his return from Russia, has launched a new drive to recruit young Latin Americans for his school of terrorism. Dubbed the "Academy of Terror" by the recruits, he school is located at Minas del Frio, a village in the Sierra Maestra mountains. It is from these mountains that Cuba's dictator launched his own successful

ABOUT 10,000 young men and women from various parts of the Western Hemisphere are already reported to be training at Minas del Frio. Courses include instruction in the use of light weapons and how to commit acts of terrorism and sabotage singly or in small groups.

Some of the recruits for the

academy of terror reach Cuba

by air from Mexico City. But the majority are believed to be transported in Russian and Cuban ships or in small boats from nearby Central America. Graduates of the academy, before they return to their naive counries, are supplied wih money, propaganda material, and small arms. They also receive quantities of arms shipped through commercial air-lines, in the baggage of Cuban

diplomats or in small boats

which cross from Cuba at night

to the Yucatan Peninsula of

Mexico and then down the

shoreline of Central America. A regular route in contraband arms is also known to run from Brazil through Bolivia and into Peru.

LATEST RED STRATEGY in Latin America, in the view of specialists on communism, is a victory for Premier Khrushchev's go-slow policy over Red China's revolutionary brinkmanship. Its immediate aim is to make shambles of President Johnson's efforts to stimulate economic development and social progress in Latin America.

It costs the Russians \$1 million a day to keep Fidel Castro in power. Plagued by their own economic and political troubles they are obviously not interested at present in encouraging Red revolutions which might jeopardize their trade with the West and bring them into open conflict with the United States.

Premier Khrushchev aims to achieve through a permanent terror which breeds fear, economic instability and chaos what Mao Tse-tung seeks to gain through "direct revolutionary action.

MORALE-BUILDER

It has been said that nothing is more rewarding as a morale builder-upper than a chic new hairdo. So, if you feel the need for shedding your winter doldrums, give the idea thought and action. There are simply countless new styles to check on. A successful hairdo is decided by the texture of your hair plus the amount of natural curl or wave it possesses. The best way is to go along with your hair "personality."

Primarily, your hairdo should be becoming, comfortable and man-ageable. Let us arrange it for

## Stuffed Pork Chops Real Dish

Company is coming and what | Pork Chops - Caper Stuffing should you serve? You'll easily resolve the problem by choosing thick pork chops and bestowing

them with a gourmet touch.

One splendid idea is to fill the chops with a bread stuffing spiced with capers (tiny flowering buds of the caper bush). Guests will surely rave!

Rib chops at least 1 inch thick are best for stuffing and the pocket should be cut into the meat along the rib bone. If the chop has two bones, cut between

Place in preheated very hot oven (500) degrees) for 25 minutes, the reduce heat to 325 degrees for the remainder of the time.

Roast until thermometer registers rare, medium or well done - whichever you prefer. Because of the high temperature at the beginning, meat roasts quickly. For rare, it takes about 1 hour and 45 minutes — but trust only your thermometer!

Cook enough ahead so that roast can rest on warm platter, beneath aluminum foil, at least half an hour before serving.

Make a sugar syrup flavored with some strips of orange rind. Pour the syrup over orange segments and serve as a dessert. If you like to add a little spirit to fruit desserts, you may stir a little white rum, cherry brandy or cognac into the syrup.

If it's available you can use

a shallow roasting pan with a v-shape rack that locks into place. In such a pan the meat is held just right for browning and there's plenty of room for the potatoes and onions.

Other sliced vegetables are placed in the pan at the beginning of the roasting and we usually pray that they get charred. Its the charring that here's to give the pork gravy its great flavor.

FRESH HAM WITH PAN-ROASTED POTATOES AND ONIONS

1 shank half of pork leg (fresh ham), about 8 pounds, salt and pepper, 1 teaspoon crushed dried rosemary, 1 carrot, sliced, 1 rib celery, sliced, 1 medium onion, sliced, 8 medium pota toes, 8 small onions, 1/4 cup flour, 21/2 cups hot water.

With an extremely sharp knife slice through skin and fat of fresh ham at about 11/2-inch intervals in two directions to make a diamond pattern. Rub surface with salt and pepper to taste and rosemary. Place carrot, celery and sliced onion in the bottom of a roasting pan. Place rack in pan and ham on rack. Roast in a slow (325 degrees) oven until meatthermometer reads 185 degrees—about

35 minutes per pound.
About 1¼ hours before roast should be done, pare and boil for 10 minutes in separate saucepans the potatoes and 8 whole cnions. Drain; arrange the vegetables along the sides of the roasting pan, under the rack, turning them to coat with fat.
